# “Lotto: 72 animals”

Ref. 20526

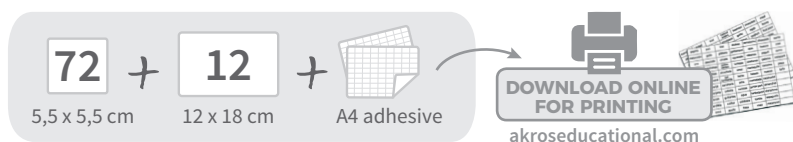

# LOTTO: 72 ANIMALS

Ref. 20526

## CONTENTS:

## RECOMMENDED AGES:

From 3 to 8 years.

## PSYCHO-PEDAGOGICAL CHARACTERISTICS

This educational material allows you to work with the pictures and words either separately or by linking the pictures with their corresponding words, making it possible to develop the child's INTERNAL LANGUAGE through MENTAL ASSOCIATION.

"Recognition" of the PICTURE, "association" with the SPELLING (word) and PHONETIC EXPRESSION (sound) all constitute a fundamental practice for increasing VOCABULARY in a natural way as well as providing an excellent READING exercise which encourages the child's LANGUAGE to evolve.

*MULTILINGUAL LEARNING:* The game's system, which provides a natural way of language learning, is an ideal method for acquiring a second language. This makes it an extremely effective tool for learning other LANGUAGES.

## EDUCATIONAL OBJECTIVES:

- Enriching basic vocabulary.
- Initiation to reading and writing.
- Autonomous relational learning. Acquiring the ability to relate pictures with words.
- Improving and encouraging internal language, a necessary stage before acquiring language on a social level.
- Developing observation skills, in terms of both the pictures and their characteristics and their corresponding spelling.
- Discovering the child's immediate environment through the photographic images.
- Acquiring vocabulary in other languages, making it possible to communicate with people from other cultures.

## METHOD OF PLAY AND RECOMMENDATIONS FOR USE:

- A lotto featuring **72 different animals** for associating in two different ways: **picture plus picture**, or **picture plus word** (name of the animal).
- To familiarise students with the material, we recommend starting with the square cards by naming each picture, as well as affixing the stickers or writing the names on the back of the small cards, whichever is applicable.
- Up to **12 CHILDREN** can play.
- The cards can be separated into two groups, according to the colour of the border on the large cards and the colour on the back of the small cards. In this way you can divide the students into two groups to work at different tables in the classroom.
  1. Hand out the large cards among the students and leave the small cards face-up on the table.
  2. Each student needs to find the 6 small cards that correspond with his/her large card to complete it, either by associating the pictures or, at the next level of difficulty, by associating each picture on the card with its relevant name (using the back of the small cards).
