

Assembly instructions for
AKUCORNER *element*

Acoustic panel 15 mm

Upper profile & lower profile

End sections (image show right side)

One **AKUCORNER** *element* consist of following components:

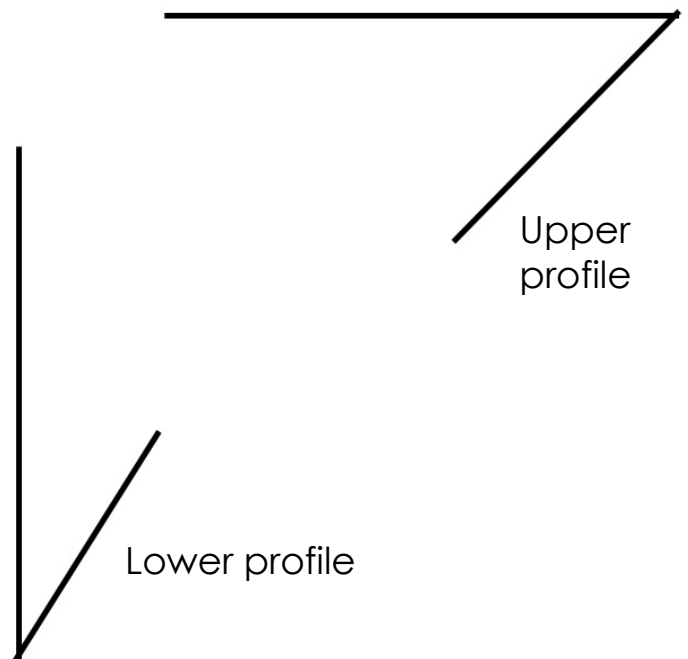

- 1 pcs. lower profile 240 cm or 120 cm
- 1 pcs. upper profile 240 cm or 120 cm
- 2 pcs. end sections (right and left side)
- 2 pcs. acoustic panels 15 mm 120 x 30 cm

AKUCORNER *element* - install:

1) Bend the side sections of the mounting unit / end section

2) Mount one of the end sections to the wall. Only one screw in the top hole into the wall to start with. The end section has to touch the ceiling.

3). Use one of the aluminum profiles to measure where the other end section is to be placed. Mount the second end section. Only one screw in the top hole.

4). Mount the upper profile by sliding it into the top of the end section. The profile is kept to its place at the lower part of the end section. Mount the top profile with the widest side to the ceiling.

5). Mount the bottom profile and put the last screws in place on the wall and in the ceiling.

6). Mount the acoustic plates. Start to push the plate into the upper profile, where after it can slide into the lower profile. Afterwards you push each plate nicely together.
