

Instruction of Wedges

	
Step 1a	Step 1b
	
Step 2,3,4	Finished

1. Insert two wedges into the two slots on one corner, as the direction in the shown picture.
2. Place a paper card between the stretchers and the canvas on the corner. (This keeps the canvas from accidental contact while hammering the wedges.)
3. Hold the canvas upright and use a small hammer to knock the wedges upwards into the slots.
4. Always use the wedge to move one stretcher at one time. (This keeps the canvas square.)
5. Finish the other 3 corners the same way as above.
